

INTRODUCTION

As a Company of repute, we recognize that improving our procurement system is a continuous process and that our suppliers, both large and small are important partners in our journey to becoming more sustainable. We are committed to managing the impact of our operations, our supply chain and the environment at large, as this is paramount to the long-term sustainability of our business.

E-Jerrys has a responsibility to ensure that materials we purchase or use do not contribute to environmental degradation in any way.

This policy integrates sustainable procurement considerations into our procurement system with the aim of reducing adverse social, health and environmental conditions.

What is sustainable procurement?

This is an avenue to provide more value to the organization by initiating economic, social and environmental principles into procurement system, thereby enabling communication during purchasing process and improving productivity, accessing value and performance with suppliers and stakeholders.

This policy explains ways sustainable procurement is integrated into E-Jerrys procurement practice.

- Concerned parties, including suppliers must adhere to all laws and requirements regarding this policy.
- Application of fair and ethical sourcing practices during procurement process and suppliers must comply with socially responsible practices, including health and safety.
- Practices that minimize negative environmental impact will be encourage throughout the operations of our supply chain.
- The use of resources and generation of waste of all types, including water and energy will be reduced and managed properly in procurement process.
- Chemicals and other materials posing hazard on the environment must be identified and managed properly to ensure their safe handling, movement, recycling, use or reuse and disposal.
